DYEING EMBOSSED
TEXTILE**

(57) Abstract:

PURPOSE: To obtain a multicolor top dyeing embossed textiles with a cubic effect by selectively pressing an original fabric, which is previously embossed, through a transfer paper to provide the secondary embossment to the fabric and by transfer- printing a color-design pattern to the top face of the secondary embossment simultaneously.

CONSTITUTION: The original fabric 2 in which the concavo-convex embossment (primary embossment) is previously formed is pressed together with the transfer paper 1, which has color-design pattern, by the two-stage embossment transfer machine that consists of the embossment pattern roll 3 and flat cushion roll 4. The color-desin pattern is transferred to the original fabric 2 according to the design of the embossment pattern

design of the embossment pattern roll. In this way, a top dyeing embossed textiles in which there exist the primary and secondary embossments 5', 5" and the color-design pattern 5a is not transferred to the primary embossment 5' but only to the top face of the secondary embossment 5" can be obtained.
